# My Presentation

With a good subtitle :-)

# The basics

#### **Getting started**

Use Markdown to write your slides. Don't be afraid, it's really easy!

My Presentation 2 / -

# The basics

#### **Getting started**

Use Markdown to write your slides. Don't be afraid, it's really easy!

## Making points

Look how you can make some points:

- Create slides with your favorite text editor
- Focus on your content, not the tool

You can finally be productive!

My Presentation 2 / 4

## There's more

#### Syntax highlighting

You can also add code to your slides:

```
<div class="impact">Some HTML code</div>
```

#### CSS classes

You can use shortcut syntax to apply SOME style!

...or just HTML if you prefer.

My Presentation 3 / 4

#### And more...

#### 12-column grid layout

Use to the included **grid layout** classes to split content easily:

#### Left column

- I'm on the left
- It's neat!

#### Right column

- I'm on the right
- I love it!

#### Learn the tricks

See the <u>wiki</u> to learn more of what you can do with Remark.js
